December 6, 2021

This letter is to inform you that one of our staff members tested positive for COVID-19 on 12/5/21. This employee last worked in the facility on 12/4/21 on the fourth floor. We are following current guidance and working with the local health department in response to this finding. At this time, we have placed residents who were directly cared for by this individual on precautions/quarantine to monitor for potential symptoms of COVID-19. We will be conducting testing for COVID-19 this week at the direction of health officials and will inform you of the results. At this time, no residents are demonstrating signs or symptoms of COVID-19.

There will be no change to visitation at this time other than to provide enhanced education and information with regards to infection control practices and increase of personal protective equipment for visitors wishing to see residents identified as possibly exposed.

I will keep you informed with any changes or updates.

Rachel Lentine RN

Director of Nursing

Mt. Carmel Rehab & Nursing Center
